

## Filling the Gap in Accounting and Financial Expertise

In today's business environment, companies have a never-ending calendar of financial reporting obligations – all of which must adhere to countless complex and constantly changing rules and regulations. Often, there's a gap between reporting requirements and a company's ability to comply efficiently, accurately and on time.

Blythe Global Advisors helps companies of all sizes meet their reporting requirements by filling the gap in accounting and financial expertise. Our executives bring extensive Big Four experience and leadership to every engagement. We are experts in U.S. generally accepted accounting principles (GAAP), Securities and Exchange Commission (SEC) regulations, the Sarbanes-Oxley Act (SOA), and international financial reporting standards (IFRS), and in applying those principles and regulations to intricate transactions. We have a proven track record of helping clients in all areas of accounting -- from simple financial statements to complex business combinations.

We offer businesses a broad range of customized, cost-effective solutions.

- ◆ **End-to-End Accounting Advice, Assessment and Process Improvements:** We evaluate current processes and skills and recommend best practices to upgrade accounting competency. As needed, we provide tailored education or interim financial management.
- ◆ **Mergers and Acquisitions:** We work with companies at every phase to help determine the accuracy of underlying assumptions and structure a final agreement that identifies and leverages opportunities while resolving problems and risks. We develop integration plans that exploit synergies early to enable the merger or acquisition to get off to a quick start.
- ◆ **GAAP and SEC Compliance:** We help businesses research, prepare and document appropriate accounting positions according to the latest principles – resolving issues when the “books are closed” and avoiding uncomfortable and expensive surprises during the audit.

We also provide customized, affordable solutions for the following practices.

- ◆ **Advice and Training for Small and Mid-Sized Accounting Firms:** From maintaining certification to in-depth advice on complex issues, we help smaller accounting firms provide a level of service to their clients that is usually available only from larger organizations.
- ◆ **Litigation Support:** We provide unbiased advice on how complex, technical accounting rules affect clients' positions. As needed, we provide or support expert testimony.
